

## Profession de foi - REUSSIR 2025 with Bruno LINA

Dear colleagues,

23<sup>rd</sup> January 2025 will be election day to elect staff and student representatives on the university's central councils.

We hereby present lists that have been meticulously compiled, harmonized, and made coherent for all constituencies. These lists are based on a unified project. **Please note that all elected representatives will endorse Professor Bruno Lina's candidacy for the presidency of the university.**

Our candidates are the reflection of our institution: they represent the diversity of components, disciplines and professions that unite us around the same objectives. They work devotedly to promote education, research and the university's cultural and scientific reputation.

**Our plan is to break away from the university's centralized, authoritarian, and opaque system.** This system has weakened and isolated the university so much, both internally and externally. Our community has many great assets that make us stand out. We have a lot of human talent, scientific knowledge, and cutting-edge technology. That is why LYON 1 is thriving. We have had a lot of exciting projects that have been met with great success. Our degrees are popular and well-respected. The research we produce is recognized globally. We want to protect all this. We want to protect it from the exhaustion that comes with projects that are carried out under constant pressure but never completed. We aim to protect it from the discouragement that comes from a lack of trust and recognition, and protect it from the absence of clear and sustained political guidelines.

Bruno Lina, a university professor and hospital practitioner, will be the university president for one single four-year term. He will coordinate **a new team, respecting gender parity** at all levels: vice-presidencies and deputy vice-presidencies. The first level will include Sandrine Charles on the Board of Directors, Arnaud Brioude on the Research Committee, and Julie-Anne Chemelle on the Education and University Life Committee. The entire presidential team will act in a coordinated, independent, and responsive manner. Each of the university's shared or central services will have a direct link with a member of the presidential team.

A careful, methodical review will be undertaken to assess how the university can be better organized internally to give its different parts more independence and autonomy. This will involve new methods of organizing things and the possibilities offered by the Education Code for transferring skills and grouping components, which LYON 1 has so far neglected. We will collaborate with these components to see how we can make the most of our strengths in science and engineering, health and the humanities. We will encourage new cross-fertilization by drawing inspiration from the successful experiences of Shape-Med@Lyon and the SFRIs (Structurations de la Formation par la Recherche dans les Initiatives d'excellence).

We will build new and innovative relationships with our partners in the Lyon – Saint-Etienne ecosystem. These partners are paying close attention to the future of LYON 1. We will use the Community of Universities and Establishments (ComUE) as **a forum for exchange and joint construction**. We will re-establish and resume the dialogue with the governing bodies of the partner universities and schools to restore a relationship based on mutual trust and respect with these bodies. Each of our degrees and research units has its own strengths, added value, and ways they can work well together. We need to talk about these things in an atmosphere of peaceful dialogue.

Our partners include the Hospices Civils de Lyon (HCL). We share staff, students, resources, and projects with them. We also share society's responsibilities and legitimate expectations. Today, we are presenting a new and exciting project that we are working on with the HCL. You can find more information about this project on our website. Our goal is to create new ideas in healthcare, science, and engineering. We are suggesting tools for a worldwide approach that

combines care, training, and research activities.

Our relationships with research organizations are also very important for the success of the LYON 1 project. We share the responsibility of ensuring our policies are consistent, that our resources are coordinated, and that research unit staff members are all working on the same project, no matter who their employer is. To achieve this goal, we need a coordinating committee with real power, we need to share the DIALOG tool (namely, the shared tool to support management dialogue between research units and their supervisory authorities), and we need cross-disciplinary institutes that must continue to build towards advanced "graduate schools such as those initiated by LABEX, or laboratories of excellence, and SFRI, or structuring training through research and innovation. By jointly targeting certain objectives specific to our site, the higher education and research institutions and the National Research Organizations will be able to create significant leverage effects through the concerted contribution of human resources, material resources and communication tools.

The establishment of an Ecological Transition Vice-Presidency and a consultative conference will ensure active contribution to the institution's policy, thereby centralizing the challenges of transition and social responsibility within the university's governance framework.

This overview is only a selection of some of the key aspects of the project.

We want to conclude with the most important point. Without it, all other matters would be just words: human relationships. Frequently, these are contrasted with an obligation to perform. But performance is a consequence, not an objective! The goal of our governance is **a robust university** built on quality human relationships, rooted in trust and respect; a university where everyone knows their role and participates in the process. A university where people who stumble are not left behind, where *all* forms of violence are prohibited. A university that we are proud to belong to. And then, together, we can see and celebrate our accomplishments and reinvent the university of tomorrow.

### **Candidates on the "REUSSIR 2025 with Bruno LINA" lists**

*Vincent Andrieu, Corinne Augier, Lionel Ballut, Christophe Batier, Alexandra Berlingard, Oriane Blondel, Sandie Bernard, Frédéric Bérard, Olivier Boisron, Sylvain Brandel, Lorenzo Brandolese, Catherine Barentin, Arnaud Brioude, Isabelle Bonnamour, Sybille Caraboeuf, Marie Castets, Antoine Cazes, Lydie Chambas, Sandrine Charles, Julie-Anne Chemelle, Mathias Choquer, Charline Creuzé des Châtelliers, Florence Denis, Sebastien Devillard, Franck Di Rienzo, Patricia Doublet, Sylvie Dupré-Aucouturier, Sonia Duprey, Arnaud Duran, Gilles Escarguel, Rosaria Ferrigno, Marie Frenea-Robin, Laurent Gaucher, Brigitte Grosogeat, Emma Guillet-Descas, Thibaut Guyotot, Francois Hallé, Estelle Homeyer, Xavier Jaurand, Bruno Lina, Patrice Lomonte, Julien Maratier, Valérie Martinez, Simon Masnou, Olivier Meurette, Bruno Montcel, Nora Moumjid, Angélique Mularoni, Madiha Nadri-Wolf, Alexandre Noiriel, Jérôme Randon, Agnès Richaume, Dominique Roland, Romain Rombi, David Romeuf, Pierre Saintigny, Anne-Marie Schott, Benjamin Schraen, Sophie Spillone, Latifa Taïeb, Raphaël Terreux, Etienne Testa, Cyril Villat, Florence Wisniewski, Florence Zara.*

You can find our lists, details of our proposals concerning governance, training, campus life, research, staff, links with the HCL and the ONR (Organisme National de Recherche) and other information on our website: <https://www.reussir2025.fr/>.
